EDUCATION

B.E. in Electronics & Communications Engineering
St. Joseph's College of Engineering
Chennai, India, May 2015
Grade – 7.008 CGPA

SKILLS

- **CI/CD & Build/Release:** Jenkins, GitHub Actions, Azure DevOps, GitLab CI, Looper, Automic
- **Pipeline as Code:** YAML pipelines (Jenkins, GitHub Actions, Azure DevOps)
- **Container & Orchestration:** Kubernetes (WCNP / AKS / EKS), Docker, Helm
- **IaC & Config Management:** Terraform, ARM Templates, Ansible, Puppet
- **Cloud Platforms:** Azure, AWS, WCNP (Walmart Cloud Native Platform)
- **Scripting & Automation:** Python, Bash / Shell Scripting, PowerShell
- **Monitoring & Observability:** Grafana, Prometheus, ELK Stack, Splunk, JIRA, ServiceNow
- **Operating Systems:** RHEL, CentOS, Ubuntu, SUSE Linux (SLES), Unix
- **Version Control:** Git, GitHub, Bitbucket, Azure Repos
- **Virtualisation:** VMware vSphere, VMware Horizon Client, IPAM

SUMMARY

Senior DevOps / Systems Engineer with 9+ years of experience in application build & release, CI/CD pipeline engineering, cloud infrastructure, and automation. Currently at Walmart Global Tech India as a Systems Engineer III, owning end-to-end delivery pipelines using Jenkins and GitHub Actions with YAML-based configurations, Kubernetes workloads on WCNP, and infrastructure-as-code via Terraform. Skilled in Python and Bash scripting for automation, with hands-on experience in monitoring tools and a strong foundation in Linux/Unix administration and container orchestration.

WORK EXPERIENCE

Systems Engineer III | Feb 2021 – Present
Walmart Global Tech India, Chennai, India

- Own end-to-end application build and release processes across multiple environments, ensuring consistent, reliable, and auditable deployments using Jenkins
- Author and maintain YAML-based CI/CD pipeline definitions for build, test, and deployment stages, enabling self-service delivery for development teams.
- Manage Kubernetes workloads on WCNP (Walmart's enterprise Kubernetes platform, equivalent to AKS/EKS), including Helm chart authoring, namespace management and resource optimization.
- Provision and manage infrastructure-as-code using Terraform, maintaining reusable modules for compute, networking, and storage resources across on-premises environments.
- Develop Python and Bash automation scripts for deployment validation, health checks, log parsing, and operational runbook automation — reducing toil and human error.
- Implement and maintain monitoring and observability stacks (Grafana, Prometheus, ELK/Splunk) to track system health, pipeline metrics, and SLA compliance.
- Collaborate with application teams to define branching strategies, release gates, and DevOps best practices across the engineering organization.
- Lead incident response for infrastructure and deployment failures, driving root cause analysis and implementing preventive automation.

Associate – DevOps / Linux Engineer | Jan 2016 – Feb 2021
Cogizant Technology Solutions, Chennai, India

- Managed application build and release pipelines using Jenkins and Automic for Walmart Stores, Inc. (Bentonville, USA), supporting IT and UAT environments across 200+ virtual machines.
- Designed YAML-based Jenkins pipeline configurations for automated build, test, and deployment workflows, reducing release cycle time by ~35%.
- Automated infrastructure provisioning and configuration management using Terraform and Ansible playbooks, cutting manual setup effort by over 60%.
- Managed VMware vSphere infrastructure for VM provisioning, cloning, and lifecycle management across development and testing environments.
- Wrote Bash and Python scripts to automate repetitive deployment, health check, and database migration tasks.
- Implemented Puppet for server compliance and configuration enforcement across the server estate.
- Managed Git workflows (GitHub, Bitbucket) — branching, rebasing, pull request reviews — for distributed teams.
- Resolved infrastructure and release incidents via JIRA, ServiceNow, and BMC Remedy, acting as primary SPOC for multiple project teams.
